Entangled worlds

Each release carries its exoplanet: mass, temperature, discovery year, star light, light time. The world is the instrument's cover and its data.

Creator

bright-sparks-05

An abstract artwork featuring a large, stylized ear in red and yellow against a dark background. The ear is rendered with thick, expressive brushstrokes, and the background is a mix of dark, textured areas and bright, torn-paper-like edges. The overall composition is dynamic and layered.

Helix

What emerges is not a finished work, but a living configuration that we call regenerative music. Optionally, the processes can be modulated with real data from exoplanets mixed with the movement of the participant.

WEYA opening, curated by Gilles
Peterson · Nottingham

2012

A person is shown in silhouette, looking down at a large, glowing screen. The screen displays abstract, colorful patterns in shades of orange, yellow, and pink. The person's hair is dark and curly. The background is dark, and the overall atmosphere is artistic and modern.
